

TIPPY TAPS

What do you do?

Sometimes when you're camping or in the bush, there's nowhere to wash your hands. What do you do?

Some Worldbuddies face this problem every day because they don't have water pipes or taps in their homes. Here's one solution!

Maganga washes his hands using a tippy tap.

Tippy Taps

A tippy tap is a simple way to wash your hands even if you don't have a tap. There are different designs, and you can use whatever materials you can find. All of them have a water bottle that is hanging from something. You tip the bottle using a rope handle or a foot control so you don't touch the handle with dirty hands. When the bottle tips, water sprinkles out of a small hole in the side. Then you wet the soap and wash your hands. It's so easy. The best thing is that you only need a small amount of water – just 40 ml is enough.

Make your own Tippy Tap

Watch the [video clip](#) and talk about what makes a tippy tap hygienic.
